WORK EXPERIENCE

- Advansys ESC – RPA Business Analyst Intern;** Free Zone, Cairo, Egypt July 2023 - August 2023
- Conducted business process analysis to identify automation opportunities.
 - Developed PDDs (Process Definition Documents) for approved automation projects.
 - Worked with stakeholders to define requirements and gather data.
- Orange Egypt – Intern / Apprentice;** Smart Village, Cairo, Egypt April 2018 - May 2018
- I spent a week observing and understanding each department in the company. At the end of the internship, we were required to present a project about the experience of 2 juries, which would be graded out of 100 points and contribute to our high school diploma grades. I successfully achieved a perfect score.

EDUCATION

- EUI | Faculty of Computing and Information Sciences** New Administrative Capital, Cairo, Egypt
Bachelor's degree November 2022 – Present
- Relevant Coursework: Introduction to Computing and Programming, Programming Fundamentals, Calculus I, II, Digital Design and Logic.
- Lycée Simone de Beauvoir / Collège de la Salle** Cairo, Egypt
French Baccalaureate Septembre 2008 – July 2022
- French baccalaureate graduate, with a general average in the bac of 14,78.

SKILLS & CERTIFICATES

- Programming Languages:** Python, R, C++, SQL
- Data Science & Machine Learning:** Python Libraries: NumPy-Pandas-Seaborn-Matplotlib-Scikitlearn, R: Tidyversegg2plot, Jupiter Notebook, Google Collab, Excel, LaTeX
- Languages:** Arabic native proficiency, English & French fluent proficiency, German conversational proficiency
- Certificates:** Data Analyst with Python - Introduction to Data Science - Cisco Networking Academy - Data Analytics Essentials - Cisco Networking Academy - RPA Business Analyst Foundation - Ui Path

PROJECTS & PUBLICATIONS

- Exploring Shark-Human Interactions in the MENA Region** Python 3
Data Analysis, Visualization and Manipulation July 2023 - August 2023
- In this MENA shark-human interaction data analysis, I harnessed Python and essential libraries like NumPy, seaborn, and matplotlib. By employing robust data manipulation, visualization, and cleaning techniques, I unearthed trends and insights within the Global Shark Attack File database. This approach not only facilitated pattern identification in shark attacks but also spotlighted critical aspects for the MENA region's safety measures and conservation strategies.
- Library Management System** C++
Object Oriented Programming April 2023 - May 2023
- Designed and implemented a library management system for my Programming Fundamentals Class.
 - The system manages a book library and allows customers to borrow/return books from the library. The project utilizes OOP concepts such as inheritance and polymorphism.
- Student Management System** Python 3
File Handling, User Authentication, User Interface, Database Integration April 2023 - May 2023
- A student management system written in Python for my Introduction to Computing Class.
 - Handles 3 types of users: student, faculty, and admin.
 - All data was reported in CSV format and operated by different algorithms specific to each use.
